

# NCS Environmental Policy

The following policy statement was reviewed and adopted at the August 2025 Executive meeting, as such the NCS Environmental policy is now as follows...

The NCS cannot and does not, condone the use of any products outside of any manufacturers stated intentions, or current legislation. So, for the avoidance of doubt, usage remains entirely at the discretion of the Chrysanthemum grower. The onus is entirely on the grower to seek suitably qualified advice in order to maintain an understanding of developments in terms of the modern-day environmental expectations &/or legislative change for the products they choose to use.
